

Associate or Full Professor

The Molecular and Behavioral Neuroscience Institute (MBNI) at the University of Michigan Medical School is seeking applicants to fill a tenured faculty position at the Associate or Full Professor level. Although all applications will be considered, we are especially interested in systems level neuroscientists who are applying molecular, cellular and genetic techniques to investigate mechanisms underlying synaptic plasticity, neural circuits, behavior or disease. We seek investigators who have a well-established, internationally recognized research program who will integrate into the existing dynamic and collaborative environment at the MBNI. For more information on the MBNI see: <http://www.mbni.med.umich.edu/mbni/index.html>.

Interested candidates should send a cover letter, curriculum vitae and a 3-5 page statement of current and future research directions as a single PDF to mbni.recruitment.2016@umich.edu.

Applications will be considered up until December 15, 2016, and initial interviews will begin in January 2017 with an anticipated start date in the fall of 2017. Women and underrepresented minorities are encouraged to apply. The University of Michigan is supportive of the needs of dual career couples and is an equal opportunity, affirmative action employer.
