

Murray B. Stein MD, MPH at the University of California San Diego has an opening for a postdoctoral research fellow to begin as early as July 1, 2017 (though later start dates are also possible). Duration is 12 months with potential for renewal for an additional 12 months.

This position, suitable for a PhD or MD applicant, would be primarily to conduct analyses and write peer-reviewed papers using the Army STARRS (www.armystarrs.org) dataset, focused on suicidality, posttraumatic stress disorder, substance use disorders, and other mental health problems and resilience. This dataset includes a wealth of epidemiological and biomarker data.

The postdoc would also have the opportunity to work on ongoing clinical trials (pharmacological and non-pharmacological) focused on anxiety, depressive, and trauma-and-stressor-related disorders. Clinical supervision is available for individuals seeking licensure as a clinical psychologist.

Requirements: PhD in a suitable field of research (e.g., psychology; epidemiology; genetics; bioinformatics), with completion of clinical internship if PhD in Clinical Psychology; and/or MD and completion of residency training in psychiatry with eligibility for California state licensure.

Salary and benefits commensurate with experience, per the UCSD postdoctoral fellow pay scale (<http://postdoc.ucsd.edu/>).

Please direct inquiries to: Murray Stein (mstein@ucsd.edu). Applications should be emailed directly to Dr. Stein and should consist of: (1) a cover letter summarizing research background, interests, and future goals; (2) curriculum vitae; and (3) names and contact information of 3 individuals who can serve as references. Review of applications will begin immediately and continue until the position is filled.
