

RESEARCH FELLOWSHIP ANNOUNCEMENT

CLINICAL AND TRANSLATIONAL RESEARCH IN MOOD AND ANXIETY DISORDERS ICAHN SCHOOL OF MEDICINE AT MOUNT SINAI

The Mood and Anxiety Disorders Program (MAP) is pleased to announce the opening of a research fellowship opportunity in experimental therapeutics and clinical neuroscience in mood and anxiety disorders. Located within the Icahn School of Medicine at Mount Sinai — internationally acclaimed for excellence in scientific research, clinical care, and education—the Program conducts early-stage clinical trials and mechanistic studies aimed at facilitating treatment discovery across the mood and anxiety disorder spectrum.

We seek candidates with an MD or MD/PhD who have completed residency training in psychiatry and who are highly motivated to develop an independent research career. The research fellow will receive one on one mentoring and work in a collaborative, multi-disciplinary environment to learn clinical/translational research methodology in mood and anxiety disorders. Fellows will have the opportunity to draw from the substantial resources of the School of Medicine, including resources located within the Friedman Brain Institute, the Translational and Molecular Imaging Institute and the Brain Imaging Center in order to carry out high-impact research across Departments. The mentored training experience may be augmented by formal coursework in molecular and behavioral neuroscience, neuroimaging methods and biostatistics. Upon completion of the fellowship, trainees will be well positioned to pursue an independent research career in mood and anxiety disorders.

We offer a competitive salary plus full benefits. Please email a curriculum vitae to:

Dr. James Murrough (james.murrough@mssm.edu).

Mount Sinai Medical Center is an equal opportunity/affirmative action employer. We recognize the power and importance of a diverse employee population and strongly encourage applicants with various experiences and backgrounds.
