

Postdoctoral Fellowship
University of Pennsylvania, Perelman School of Medicine

A postdoctoral fellowship for 2-3 years is available at the University of Pennsylvania Perelman School of Medicine, in the lab of Wade Berrettini, MD, PhD, Karl E. Rickels Professor of Psychiatry.

The research involves study of somatic DNA variation in CNS disorders, as potential sources of risk CNS diseases. Projects involve temporal lobe epilepsy, schizophrenia and cocaine addiction, using DNA from human brains of persons with these illnesses to map one type of somatic variation, long interspersed elements (LINE-1s).

This position is available July 1, 2017. Please reply with CV and 3 references to wadeb@upenn.edu.
