

Assistant Professor Yale School of Medicine

Yale University, School of Medicine, Department of Psychiatry invites applications for a full-time, academic tenure track position at the Assistant Professor level in the area of imaging genomics and/or psychiatric imaging to enhance the recently formed Division of Neurocognition, Neurocomputation and Neurogenetics (n3).

Applicants must possess an M.D. and/or PhD, and have at least two years postdoctoral experience or the equivalent. The successful candidate will be poised to build a successful, independent, extramurally funded research program. Candidates pursuing research relevant to either the genetic underpinnings of neuroimaging phenotypes or the neural correlates of mental illness will be considered. Must have a record of excellence, creativity, initiative in research and strong potential to build a vigorous and competitive research program.

Interested applicants please apply thorough Interfolio using the following link: <https://apply.interfolio.com/42358>. If you have any questions about this position please contact David Glahn, Professor, Department of Psychiatry via email at david.glahn@yale.edu.

Yale values diversity in its faculty, staff and students and especially encourages applications from women, persons with disabilities, protected veterans and underrepresented minorities. Yale is an affirmative action/equal opportunity employer. Review of applications will begin immediately and continue until the position is filled.
