

## **Postdoctoral Position in Molecular Mechanisms of Alcohol Dependence**

The Morrow Lab (<http://www.med.unc.edu/alcohol/faculty-research/a.-leslie-morrow-ph.d>) has an immediate opening for a postdoctoral fellow interested in discovery of the molecular mechanisms underlying ethanol dependence. Studies will involve the use of molecular, electrophysiological, confocal imaging and/or behavioral techniques aimed at identifying targets for the prevention/amelioration of ethanol dependence pathology. Trainees are integrated into a dynamic alcohol research center with opportunities for collaboration and career development.

Applicants should have a Ph.D. in Pharmacology/Physiology/Neurobiology or a related field and an interest in interdisciplinary research. Interested applicants should submit a CV with publication list and letter of interest to:

A. Leslie Morrow, Ph.D. Email: [morrow@med.unc.edu](mailto:morrow@med.unc.edu)
