Role in Scientific Program Management or Scientific Review

(The below questions are not mandatory and are intended for extramural government investigators. Please only answer if applicable).

Nominee Name:

Please describe your exact role in scientific program management, regulatory science, or scientific review that will help the committee understand your contributions to neuropsychopharmacology based research by addressing the following questions:

1. **Describe your exact role in providing leadership and direction for programs of national or international scope as evidenced by the following:**

    a. establishes major goals and objectives for scientific research programs
    b. initiates pioneering programs
    c. serves as an expert and consultant in both a defined area of science and in extramural scientific program management or scientific review

2. **Give examples of your role in the formulation and communication of national or international program objectives as evidenced by the following:**

    a. serves as an expert on a particular project which has resulted in tangible products or contributions to the national funding, regulatory science, or advocacy agency/organization
    b. serves as spokesperson for the agency or organization concerning scientific program direction and overall policy for the scientific community
    c. provides advice, consultation and direction which is recognized as authoritative within the agency or organization by leaders in the scientific community
