

## **Post-Doctoral Research Associate Position**

**Position Title:** Post-Doctoral Research Associate

**Position Location:** Autism and Obsessive Compulsive Spectrum Program at Montefiore Medical Center, Albert Einstein College of Medicine

**Description:**

Dr. Hollander's team is seeking a full-time postdoc to work on pharmacological studies for the treatment of Autism Spectrum Disorder, Prader-Willi Syndrome, and related conditions. The program is a part of the Department of Psychiatry at Montefiore Medical Center, Albert Einstein College of Medicine in the Bronx, NY.

The Post-Doctoral Research Associate will work directly under the Principal Investigator, Dr. Eric Hollander, and with a team of physicians, psychologists and coordinators. The position will involve working on ongoing pharmacological studies, scientific and administrative grant writing, fiscal and regulatory grant management and manuscript writing. The opportunity to develop independent projects is also available.

**Necessary Skills:**

- Applicants must hold a PhD in Psychology, Neuroscience or a related field
- Applicants should have a promising publication record and experience with statistical analysis
- Applicants must be extremely organized, detail oriented and technologically knowledgeable
- Applicants must have advanced problem solving and analytical skills, with the ability to regularly prioritize
- A commitment of at least 2 years is required.

**Start Date:** ASAP

If interested in the position, please send a cover letter and resume to:
