

## Position Available: *Neuropsychopharmacology* (NPP) Editorial Intern

*Neuropsychopharmacology* (NPP), the official journal of the American College of Neuropsychopharmacology (ACNP), has an immediate opening for an editorial intern.

The NPP Editorial Internship is intended to offer opportunities for an early-career investigator to gain unique insights and experience in the management of a leading scientific journal. It involves routine interactions with NPP Editors and staff, as well as representatives of the journal's publisher (Springer Nature). The intern assists with NPP activities including social media, and conceptualizes and implements special projects related to analysis of journal function. Past projects include published reports on gender balance in journal function (<https://rdcu.be/b8FjH>), relationships between social media and citations (<https://rdcu.be/b8FjW>), and the effects of the COVID-19 pandemic on manuscript submission patterns (<https://rdcu.be/b8Fj2>).

Expectations include participation in monthly calls and attendance at the ACNP annual meeting. Qualifications include an MD and/or PhD degree, a publication record within the fields covered by NPP, excellent writing and communication skills, and professionalism. Familiarity with NPP and/or ACNP is preferred, but ACNP membership is not required.

Interested candidates should send a letter of interest to Dr. Bill Carlezon (Editor-in-Chief, NPP) via [journal@acnp.org](mailto:journal@acnp.org). The letter should be one page or less and include a description of the candidate's (1) professional background and experience, (2) interest in neuropsychopharmacology and/or academic publishing, (3) a statement of how the internship will further their career goals, and (4) a link to their social media (e.g., Twitter) account.

The deadline for applications is December 15, 2020; the target start date is January 1, 2021.
