From Monkeys to Children: What Nonhuman Primates Can Teach Us About Psychiatric Disorders

Thursday, Sept. 16, 12:30-1:30 PM ET

Presenter: Margaux Kenwood, Ph.D.
ACNP-AMP BRAD Fellow
Post-Doctoral Fellow, Department of Psychiatry
University of Wisconsin - Madison

Register Here

We all experience anxiety throughout our lifetimes, which can be helpful for preparing us to take on challenges but debilitating when it becomes overwhelming and constant. Dr. Kenwood's research focuses on childhood anxiety and associated changes in the brain using a non-human primate animal model. Her talk will explore how different animal models can help us pave the way for better psychiatric interventions.
