

## **Autism and Obsessive Compulsive Spectrum Program** **Clinical Research Fellowship**

**Our program is currently recruiting licensed physicians for research fellowships at the Autism and Obsessive Compulsive Spectrum Program, Albert Einstein College of Medicine and Montefiore Medicine, directed by Eric Hollander, MD.**

### **Program Description**

We are located in the Psychiatry Research Institute at Montefiore Einstein (PRIME) of Albert Einstein College of Medicine. The Autism and Obsessive Compulsive Spectrum Program focuses on Autism Spectrum Disorders (ASD), Prader-Willi Syndrome (PWS), and Obsessive Compulsive Spectrum Disorders such as Obsessive Compulsive Disorder (OCD), Body Dysmorphic Disorder (BDD), and Intermittent Explosive Disorder (IED). We aim to develop innovative, novel and breakthrough treatments for unique overlapping conditions; and to clarify the underlying mechanisms of core symptom domains across these conditions. Our work seeks to bridge and translate basic neuroscience discoveries into innovative experimental therapeutics and new clinical treatments.

Our program has received funding from the Department of Defense, and the Orphan Products Division of FDA, for autism, body dysmorphic disorder, and Prader-Willi Syndrome. We also work with multiple industry partners to study novel compounds in these and related populations. Our Clinical Director, Dr. Eric Hollander, is a Professor of Psychiatry and Behavioral Sciences. He has been the PI of 10 federal grants, authored 528 publications, has 22,574 citations and an h-index of 84. He was chair of the DSM-5 Research Planning Agenda for Obsessive Compulsive and Related Disorders; was director and PI of the NIH STAART Autism Center of Excellence, and PI of the NIMH Psychopharmacology Training Fellowship.

### **Fellowship Description**

We are seeking a full-time licensed physician to work with our interdisciplinary team of physicians, psychologists and coordinators, on novel pharmacological studies for the treatment of Autism, Prader-Willi Syndrome, OCD and related disorders. The clinical research fellow will work directly under the Principal Investigator and Director, Dr. Eric Hollander.

### **Applicant Requirements**

- Applicants must have an MD and be licensed to practice in the state of New York.
- Applicants must have advanced problem solving and analytical skills, with the ability to regularly prioritize.
- 1-year or 2-year fellowship opportunities are available.

**To apply, please send CV and Letter of Interest to [eholland@montefiore.org](mailto:eholland@montefiore.org)**
