Position Available: *Neuropsychopharmacology* (NPP) Editorial Intern

Neuropsychopharmacology (NPP), an official journal of the American College of Neuropsychopharmacology (ACNP), is seeking applications for the next NPP Editorial Intern.

The NPP Editorial Internship is intended to offer opportunities for an early-career investigator to gain unique insights and experience in the management of a leading scientific journal. It involves routine interactions with NPP Editors and staff, as well as representatives of the journal's publisher (Springer Nature). The intern assists with NPP activities, including social media, and conceptualizes and implements special projects related to analysis of journal function. Past projects include published reports on gender balance in journal function (<https://rdcu.be/cN9wK>), the effects of the COVID-19 pandemic on manuscript submission patterns (<https://rdcu.be/b8Fj2>, <https://rdcu.be/cPoWx>), the implementation of guidelines for standardized reporting of clinical research (<https://rdcu.be/dhUMp>), and relationships between social media, citations, and open access (<https://rdcu.be/b8FjW>, <https://rdcu.be/dLptt>).

Expectations include participation in monthly calls at 11:00 am ET on the 3rd Thursday of each month, and attendance at the ACNP annual meeting. If selected, candidates in post-doctoral or other training positions will be asked to confirm support from their supervisor. Necessary qualifications include (1) an MD and/or PhD degree, or one that is incoming within the calendar year, (2) a publication record within the fields covered by NPP, (3) excellent writing and communication skills, and (4) professionalism. Familiarity with NPP and/or ACNP is preferred, but ACNP membership or previous attendance at an ACNP meeting is not required. Postdocs and late-stage graduate students are highly encouraged to apply.

Interested candidates should send an application package to Dr. Lisa Monteggia and Dr. Tony George (NPP Co-Principal Editors) via journal@acnp.org. The package should include a one-page letter of interest that includes a description of the candidate's (1) professional background and experience, (2) interest in neuropsychopharmacology and/or academic publishing, (3) a statement of how the internship will further their career goals, and (4) a link to their social media (e.g., Twitter and/or Bluesky) accounts, if applicable. The application package should also include a CV or NIH biosketch that is 5 pages or less.

The deadline for applications is **5:00 PM CST July 30, 2025**; the target start date is January 1, 2026. The successful candidate would receive a modest honorarium and would be invited by the ACNP to attend the 2026 ACNP Meeting in Nassau, Bahamas.
