### **3. Postdoctoral Fellow/Program Manager – PTSD, Sleep, and Psychophysiology**

This position is part of a growing research program with projects in remote experimental paradigms (e.g., psychophysiological fear-conditioning), biomarker/psychophysiology studies, and clinical trials of exposure-based treatments for Veterans with PTSD and comorbid TBI or insomnia. This work is designed to translate mechanistic and biomarker findings into more precise, scalable interventions to improve clinical outcomes for Veterans. The fellow will gain experience in clinical trial implementation, evidence-based psychotherapy, biomarker and psychophysiology methods, and program management, with opportunities to develop independent research. Strong interest in PTSD, sleep, and psychophysiology is desired.

To apply, please send your CV, a cover letter describing your research interests and experience, and three references to **[Sabra.Inslicht@va.gov](mailto:Sabra.Inslicht@va.gov)**.
